

# Percentage of Care-Seeking Adults Diagnosed with Depression (18 years and older) By Census Tract, Metropolitan Denver, Colorado, 2019-2020

## CHORDS Adult Depression Prevalence

Seven-County Metro Denver: 14.7%

Adams County: 13.0%

Arapahoe County: 13.8%

Boulder County: 15.3%

Broomfield County: 18.1%

Denver County: 14.4%

Douglas County: 15.5%

Jefferson County: 17.1%

This map displays the percentage of care-seeking adults with at least one depression or depression-related diagnosis identified by CHORDS. The percentage of care-seeking adults with depression was calculated by dividing the number of adults with at least one ICD-9 or ICD-10 diagnosis code\* residing in a census tract by the total number of adults who received care at a participating data partner.

These data are comprised of care-seeking adults age 18 and older. The total number of adults represented with at least one care encounter during the observation time period is 656,086 or 27% of the total adult population of 2,443,842, as reported by the latest 5-year American Community Survey. Census tracts are designated as having insufficient data if: 1) the total population in the census tract has fewer than 50 adults; or 2) fewer than 50 valid care encounters in the census tract were collected; or 3) coverage was less than 10% of the adult population.

NOTE: Care-seeking adults who received care at multiple data partners are only counted once in this data.

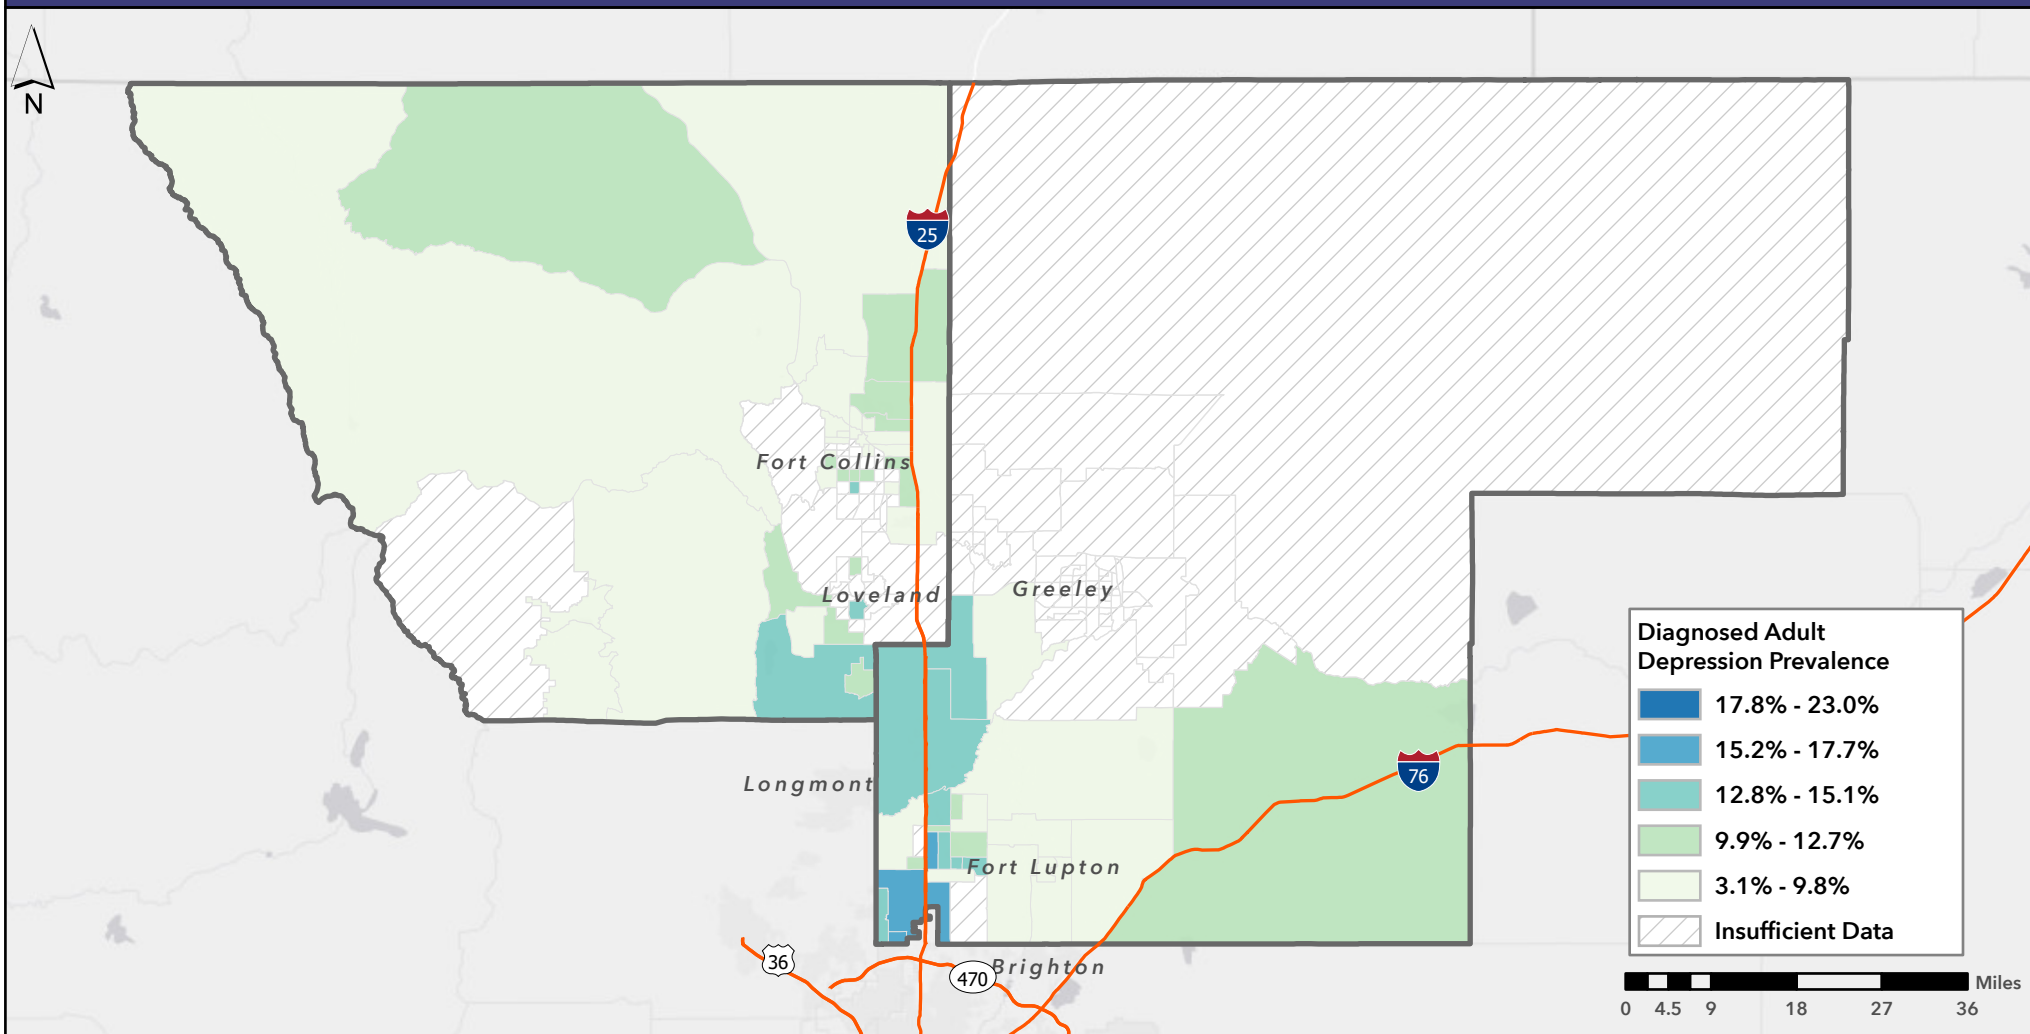

\*For a complete list of ICD-9 and/or ICD-10 codes used to define depression please see the CHORDS Mental Health Adapter documentation.

Map Created September 2021. To request additional maps and/or aggregated data tables, please contact Greg Budney, CHORDS Project Manager for Public Health, at [gregory.budney@dhha.org](mailto:gregory.budney@dhha.org).

A list of participating CHORDS Data Partners can be found at [www.chordsnetwork.org](http://www.chordsnetwork.org).

# Percentage of Care-Seeking Adults Diagnosed with Depression (18 years and older) By Census Tract, Larimer and Weld Counties, Colorado, 2019-2020

**CHORDS Adult Depression Prevalence:** Larimer County: 9.6%, Weld County: 10.7%

This map displays the percentage of care-seeking adults with at least one depression or depression-related diagnosis identified by CHORDS. The percentage of care-seeking adults with depression was calculated by dividing the number of adults with at least one ICD-9 or ICD-10 diagnosis code\* residing in a census tract by the total number of adults who received care at a participating data partner.

These data are comprised of care-seeking adults age 18 and older. The total number of adults represented with at least one care encounter during the observation time period is 64,088, or 13% of the total adult population of 501,339, as reported by the latest 5-year American Community Survey. Census tracts are designated as having insufficient data if: 1) the total population in the census tract has fewer than 50 adults; or 2) fewer than 50 valid care encounters in the census tract were collected; or 3) coverage was less than 10% of the adult population.

**NOTE:** Care-seeking adults who received care at multiple data partners are only counted once in this data.
